Career Goals

Short-term goals: Having an opportunity for me to accumulate work experience and gain practical knowledge at a company or business.
Long-term goals: I aspire to become a Web/Mobile App Developer and establish a startup team focused on Web and Mobile App development, as well as design.

Work Experience

Micro-Star International (MSI) *11/2021 - 02/2024*

Technical Support

Responsible for managing KOLs who collaborate with MSI, as well as resolving technical concerns with goods, including devices delivered for review and sponsorship. Manage booths at technology events, explain goods with consumers, and answer their inquiries.

Education

Hoa Sen University *10/2020 - Now*

Software Engineering

Senior student, get set to graduate in 2024.

Projects

HSU Dating App | *Flutter, .Net, MySQL, Google Cloud Platform*

- *Description* : A mobile app for internal university dating, operating on principles similar to Tinder.
- *Team size* : 4
- *Position* : Design UI, Front-End, Microservice Plan
- *Github* : github.com/duyquan3112/do_an_thuc_tap_lap_trinh

Employee Attendance | *React, SCSS, NodeJS, C++, MySQL*

- *Description :* A project utilizes IoT technology and RFID cards to automate and streamline employee attendance tracking. By swiping their RFID cards, the system updates attendance records in real-time..
- *Team size* : 1
- *Position* : IoT Build, FullStack Web
- *Github* : github.com/ThesngNguyen/IoT_EmployeeRFIDCheck

Scramble Words Game | *React, Redux, SCSS, NodeJS*

- *Description* : A straightforward English learning app where users are given mixed words to learn and have to transform them into intelligible words in a set amount of time.
- *Team size* : 2
- *Position* : Design UI, Front-End
- *Github* : github.com/duyquan3112/ReactNative_ScrambleWordsGame

Others Skills

Office, Adobe, Figma, Jira.
